

Dr. Rūta Sutulienė is a researcher in agronomy at the Lithuanian Research Centre for Agriculture and Forestry. Her scientific activities mainly focus on applying nanotechnology in agriculture, analyzing biochemical processes in plants, studying the impact of environmental factors on plants, and the influence of plant nutrition on their productivity. She has published 24 articles with co-authors, of which 14 are featured in journals indexed in the Web of Science Clarivate Analytics database. Dr Sutulienė has participated in eight national and international scientific projects, managing three of them. She also completed internships at the University of Antwerp (Belgium) and the University of Agronomy in Cracow (Poland). Dr Sutulienė actively participates in science popularization activities through conferences, reading seminars, writing popularization articles, and leading excursions. She is also an active reviewer of articles for both foreign and Lithuanian scientific journals.
