

THE 20TH BALTIC CONFERENCE
ON INTELLECTUAL COOPERATION
**NANOMATERIALS AND
NANOTECHNOLOGY**
**THROUGH TIME: PAST INSIGHTS,
PRESENT ADVANCES,
FUTURE DIRECTIONS**

The 20th Baltic Conference on Intellectual Cooperation (BCIC 2027)

Nanomaterials and Nanotechnology Through Time: Past Insights, Present Advances, Future Directions

6–7 May 2027, Vilnius, Lithuania

ANNOUNCEMENT

SCOPE

BCIC 2027 is dedicated to the recent history, current advances, and future developments of nanomaterials and their applications in medicine, biotechnology, materials engineering, environmental science, and agriculture.

The conference aims to foster interdisciplinary collaboration by providing a networking platform for scientists and researchers from diverse fields.

The 20th Baltic Conference on Intellectual Cooperation brings together biologists, biotechnologists, chemists, engineers, medical doctors, physicists, and experts from other disciplines who are open to collaboration and the exchange of ideas.

BRAINSTORMING AND INNOVATION

BCIC 2027 is not only about inspiring lectures: it is about advancing science through brainstorming and collaboration. We value open ideas, innovation, the exchange of know-how, and meaningful networking opportunities. Let us discuss inspiring solutions in the nanoworld and related fields, think beyond conventional boundaries, and shape the future together, thus making tomorrow's ideas a reality today.

The first circular and the BCIC 2027 website to be released soon!

THE CONFERENCE IS ORGANIZED BY

**Vilnius
University**
